**PROINERT® PRESSURE SWITCH**

**DESCRIPTION**
The Pressure Switch (P/N IG71-202) is used to provide a latching electrical input to the control system indicating that the system has been discharged. When a system is discharged manually, the pressure switch provides the input to the control system needed to activate various audio/visual warning devices and auxiliary relays, which would not be activated otherwise.

The Discharge Pressure Switch should be wall mounted adjacent to the cylinder(s) or manifold.

**Note:** After operation, the pressure switch must be reset prior to resetting the control panel.

**SPECIFICATIONS**
- **Part Number:** IG71-202
- **Switch:** Double pole, single throw
- **Ratings:**
  - 15A - 120 VAC
  - 8A - 240 VAC
- **Operating Pressure:** 100 psi (690 kpa) (Activation Pressure)

**APPROVALS**
- U.L.
- FM
- U.L.C.
